STUDY DESCRIPTION

SADA STUDY NUMBER: 0017

TITLE: Contact and Communication Between Afrikaans-speaking Whites and Coloureds [South Africa], 1986

PRINCIPAL INVESTIGATORS: Mynhardt, J C; Bornman, E

ABSTRACT: The purpose of the survey was to determine the extent, nature and effect of the contact and communication between Afrikaans-speaking whites and coloureds. Particular attention was given to factors in the work situation which could influence ethnic attitudes.

The study was a self-initiated project of the Division for Developmental and Inter-cultural Research of the HSRC.

METHODOLOGY: The white and coloured co-workers' panels of the Opinion Survey Centre (OSC) was used. The sample was restricted to the metropolitan area of Cape Town. A procedure of cluster sampling in randomly selected statistical regions, magisterial districts and enumerator subdistricts was used. Questionnaires were completed by means of interviews.

DATE OF RESEARCH: November 1986

EXTENT OF PROCESSING: rlay.sada/reform.dat

EXTENT OF COLLECTION: 2 data files in SPSS + questionnaires + machine-readable record layout

Part 1
White
Number of cases: 831
Number of records: 3 324
Number of records per case: 4
Logical record length: 80
Number of variables: 189
Number of kilobytes: 293 KB

Part 2
Coloured
Number of cases: 846
Number of records: 3 384
Number of records per case: 4
Logical record length: 80
Number of variables: 189
Number of kilobytes: 291 KB
